

## User-friendly and practical:

This is how the research department at Labor Limbach Heidelberg rates RIDA®UNITY

### About Labor Limbach Heidelberg

- MVZ Labor Dr. Limbach & Kollegen eGmbH is part of the largest owner-managed laboratory group in Germany, the Limbach Group with over 30 laboratory locations
- 5 employees work in the Infection Diagnostics Department
- The study department of the Limbach Heidelberg Laboratory has a wide range of instruments for conducting clinical performance studies
- Between 20 and 30 clinical performance studies are carried out annually, depending on the scope of the project

### The cooperation with R-Biopharm – a trusting partnership for over a decade

The study department of Labor Limbach Heidelberg has been working with the products of the R-Biopharm. These include, for example, the RIDA®GENE products and, since 2023, the RIDA®UNITY platform from R-Biopharm. These systems are mainly used in gastroenterology and respiratory diagnostics.

In the performance studies carried out by Labor Limbach Heidelberg, the products reliably impress with their flexibility and intuitive operation. Over the years, this has resulted in a very close contact and many of the clinical studies of the R-Biopharm will be implemented by Labor Limbach Heidelberg.

### Innovation and continuous improvement

Particularly noteworthy is R-Biopharm's responsiveness to customer concerns as well as the fast runtime of the PCR tests, which compared to other devices are completed within an hour. This ensures high levels of satisfaction and efficiency in everyday laboratory work.

With regard to the use of RIDA®UNITY, the team also praises the automatic and clear evaluation of the results. In the event of unclear results, the team also appreciates the option of sending samples for re-processing directly from the analysis software.

### The decisive difference

Dr. Ulrich Eigner, Head of the Academic Affairs Department, emphasizes the exceptional service quality of the partner R-Biopharm: "In the event of acute problems, we receive competent support within one to two hours. The fully automated RIDA®UNITY system is extremely robust and easy to maintain and reliable."

### Insight into the future

The MVZ laboratory Dr. Limbach and colleagues is looking forward to future product developments and optimizations of R-Biopharm, especially in the area of kits and provision of consumables. Here, the team sees opportunities to further improve efficiency and reliability.
