

## SeraSpot<sup>®</sup>

### Microspot array for efficient multiplex diagnostics

#### SeraSpot<sup>®</sup> meets various laboratory demands

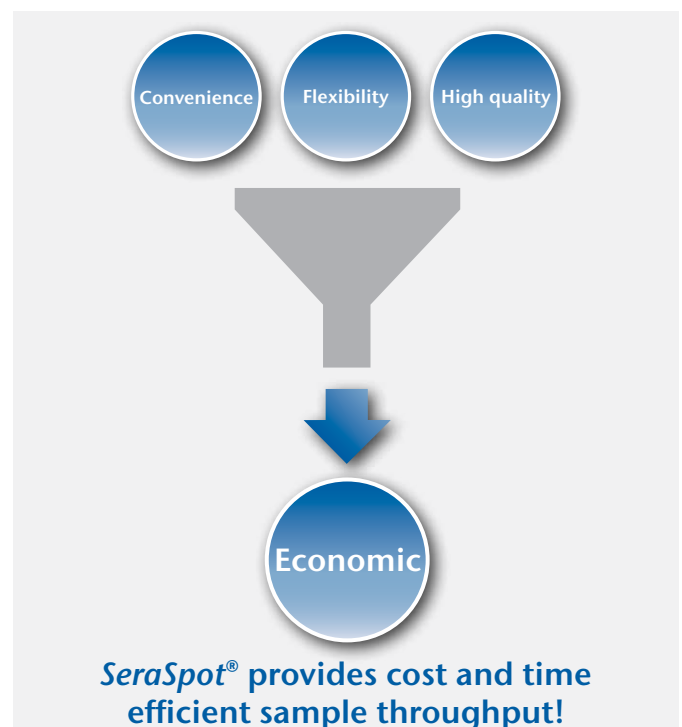

- **Combinable** – simultaneous processing of different microspot arrays
- **Flexible** – different scanner and test package sizes available
- **Automatable** – for use on common ELISA processors

#### SeraSpot<sup>®</sup> meets high quality standards

- **High-value** – high sensitivity and specificity
- **Reliable** – built-in controls and color coded arrays
- **Robust** – stable color complex formation

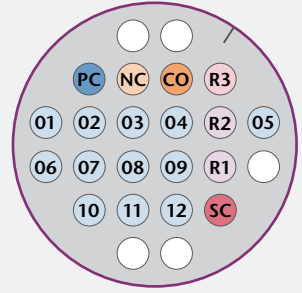

#### SeraSpot<sup>®</sup> meets user requirements

- **Adjustable** – fits into your present workflow
- **Convenient** – ready-to-use reagents and universal test procedure
- **Simple** – intuitive software for non-biased evaluation

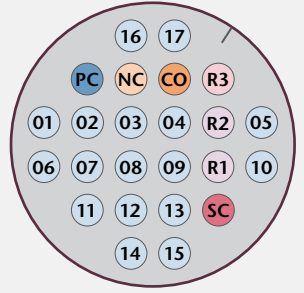

## SeraSpot® meets ideal antigen selection

...for the detection of autoimmune disease
